

Your Trust and Investment Choice

First Foundation Bank offers trust and investment solutions to create wealth now and for the future. The wealth you have created and earned represents your enduring legacy. We will help you administer the orderly transfer of your estate with the least tax burden while achieving your personal and philanthropic goals.

Why Choosing First Foundation Bank Trust Services is the Right Choice

At First Foundation Bank Trust, our size is our strength. We provide high levels of attention to each client because our culture reinforces early decisions we made that each trust officer would maintain a limited number of clients to ensure the highest level of client service. Further, most of us are owners and thus have a vested interest in the longevity of the bank and in providing our clients with high levels of satisfaction in the delivery of our services. This ensures consistency and a commitment to excellence. We also have significant in-house investment management, high net worth planning, and family wealth management educational programs offered by our affiliate, First Foundation Advisors. Our suite of solutions makes us the best choice in private banking and the only independent bank with this depth of services.

Our trust executives and staff bring over 50 years of industry expertise. Our culture assures exceptional fiduciary services, creating and managing superior generational relationships. As trustee, we accomplish this through utilizing a tax sensitive investment discipline that rewards clients by building and maintaining greater generational wealth. This structured, yet personalized approach binds us to our clients and gives them confidence knowing that we will rigorously carry out their instructions for generations.
